SUMMARY

Full Stack Developer specializing in **React.js and Django**, with experience building scalable web applications and REST APIs. Skilled in **state management, authentication systems, and performance optimization**, delivering responsive and user-centric applications. Experienced in **API integration, role-based access control, and database design**, with a strong focus on clean architecture and efficient backend systems.

EXPERIENCE

Frontend Developer, WebOne Pvt Ltd

01/2026 – Present

- Migrated existing web applications from **Django MVT architecture to React.js frontend**, improving UI scalability and maintainability
- Converted server-rendered templates into **component-based React architecture using hooks**
- Integrated frontend with backend APIs using **Axios / Fetch for seamless data flow**
- Improved application performance and user experience through **optimized rendering and responsive design**
- Collaborated with backend developers to ensure smooth **API integration and data handling**
- Refactored UI components to enhance **code reusability and maintainability**

Junior Web Developer, Pixel Junkie Creative Studio Pvt Ltd Web Development

09/2024 – 12/2025

- Developed a **full-stack web application** using React.js and Django, handling complete frontend-backend integration
- Designed and implemented **RESTful APIs using Django REST Framework** for seamless data communication
- Built **role-based authentication systems**, improving application security and user access control
- Optimized API performance and reduced response time by ~25%

INTERNSHIP

Python Full Stack Developer Intern, SMEC Labs

01/2025 – 12/2025

- Built full-stack web applications using **React.js, Django, and MySQL**
- Developed an **eCommerce platform** with dynamic product management and admin dashboard
- Implemented secure authentication features including **email verification, password reset, and account logout**
- Integrated REST APIs and managed frontend state using **React Hooks and Context API**
- Applied **form validation, role-based access control, and real-time data handling**
- Collaborated in a learning-based development environment following **industry best practices**

PROJECTS

Take Off Holidayz, Travel Agency Client (Freelance work)

- Collaborated in a team to develop a **responsive travel booking platform** using React.js and Django
- Built and integrated **REST APIs for dynamic data handling and booking functionality**
- Developed reusable React components and implemented **state management for smooth UI updates**
- Contributed to **frontend-backend integration**, improving performance and responsiveness
- Implemented authentication and optimized API calls for efficient data flow

Randall's Harvest, E-commerce website

- Developed a **fully functional eCommerce frontend** using React.js with dynamic product listings and user-friendly UI
- Built reusable components using **React Hooks and component-based architecture**, improving scalability and maintainability
- Integrated backend APIs using **Axios / Fetch** for real-time product data and user interactions
- Implemented features like **product filtering, cart management, and responsive design** for seamless user experience
- Optimized frontend performance using **lazy loading and efficient state management**
- Designed responsive layouts ensuring compatibility across devices and screen sizes
- Improved UI performance and reduced load time by ~20%

Book E-Store, Full stack project

- Built a full-stack application using **React.js and Django** for book management
- Implemented CRUD operations and REST APIs for efficient data flow
- Added **role-based access control** for admin and user functionalities
- Integrated image upload and seller identification features
- Designed responsive UI with React Router for seamless navigation

Education

Bachelor of Science in Electronics and Computer Science (BSC), <i>Bengaluru City University</i>	2021 – 2024
Higher Secondary Education, <i>Mount Tabor</i>	2019 – 2021

TECHNICAL SKILLS

Frontend development

- React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Hooks, Context API, React Router

Backend Development

- Python, Django, Django REST Framework, REST APIs, JWT Authentication, Role-Based Access

Database

- MySQL, PostgreSQL, MongoDB, Django ORM

Tools

- Git, GitHub, Postman, Vercel, Render, VS Code

Additional Skills

- API Integration, Responsive Design, Component-Based Architecture, Performance Optimization

Languages

- English
- Malayalam
- Hindi
